## Corrofix™ Neutraliser for Acidic Treatments

PART NUMBER	AVAILABLE SIZE
CT-SSN-750ML	750ml Trigger Spray
CT-SSN-5L	5L Bottle
CT-SSN-20L	20L Drum

### PRODUCT DESCRIPTION

Chemtools® Corrofix™ Neutraliser for Acidic Treatments is a concentrated alkaline solution that is specially formulated to neutralise acidic pickling waste or other acid deposits on stainless steel welds and other metals. It contains an inbuilt pH indicator which provides a visual colour change when neutralisation has been completed.

Neutraliser for Acidic Treatments rinses off easily with water.

### DIRECTIONS (READ LABEL BEFORE USE)

#### Neutralisation of Work Pieces

Wash off as much of the acidic residues as possible with water.

Apply Neutraliser by spray, plastic brush, or sponge until effervescences stops and the colour changes from pink to clear.

When the solution stays pink the acids have been neutralised.

#### Neutralisation of Waste Liquids

Add Neutraliser to waste in the ratio of **1.5 Litres of Neutraliser to 1 Litre of waste**.

The solution will effervesce, and a colour change will occur when completely neutralised.

### FIRST AID & SAFETY PRECAUTIONS

Please refer to Safety Data Sheet (SDS) before use. Use proper Personal Protection Equipment. Do not get in eyes, on skin, or on clothing. Use with adequate ventilation. Avoid breathing fumes. Keep away from heat, sparks, open flames, and hot surfaces. This product may produce adverse health conditions, ranging from minor skin irritation to serious systemic effects. It should not be used, stored, or transported until the handling precautions and recommendations as stated in the Safety Data Sheet (SDS) for this product have been fully understood by all persons who will work with the material.
