Heavy Duty Truck Wash

PART NUMBER	AVAILABLE SIZE
CT-TWHD-5L	5L Bottle
CT-TWHD-20L	20L Drum
CT-TWHD-200L	200L Drum

PRODUCT DESCRIPTION

Chemtools® Heavy Duty Truck Wash is a premium quality liquid soap for truck and trailer washing applications. It rapidly dissolves and removes the toughest soils and road grime, working exceptionally well with air pressurised misting sprayers, or automatic washing equipment in both hot or cold water. Its powerful, extreme performance formula contains corrosion inhibitors and provides residual protection to surfaces to further resist rust.

Heavy Duty Truck Wash leaves vehicles impressively shiny and streak-free, inside and out. It will not strip quality polishes, and is safe to use on all surfaces, including plastic, rubber, chrome, and aluminium. As it removes built up pollutants and abrasive grime particles, it is the perfect solution for efficiently degreasing concrete and asphalt workshop floors and benches, and can be diluted to a ratio of 1 part cleaner to 250 parts water for a concentration suited to the severity of cleaning required.

As an economical multi-purpose soap designed to replace a variety of other cleaning products, TWHD is widely used in multiple industries, including marine, mining, and farming, and often for the manual washing of heavy machinery, parts, equipment, and tools. With its non-toxic and biodegradable formulation, Heavy Duty Truck Wash is guaranteed safe and mild enough, once diluted, to use on hard-working hands and soiled materials such as greasy overalls, tarpaulins, and truck curtains.

DIRECTIONS (READ LABEL BEFORE USE)

Prior to washing, inspect surfaces to check for powdery, oxidised paintwork. Poor quality, or fatigued polishes may result in a patchy or mottled finish. Also, ensure paintwork has not been heated by the sun, or a recently running motor. Wait for the surface to cool before commencing.

DILUTION

Automatic Washers or Spray Equipment: Refer to manufacturer instructions for the recommended ratios.

Hand Washing: For general conditions of surface contamination, mix 1 part solution with 20 parts water (hot or cold). Heavy deposits or grease contaminated areas may require double the concentration.

FIRST AID & SAFETY PRECAUTIONS

Please refer to Safety Data Sheet (SDS) before use. Use with adequate ventilation and avoid breathing fumes. Avoid contact with eyes and skin. This product may produce adverse health conditions, ranging from minor skin irritation to serious systemic effects. It should not be used, stored, or transported until the handling precautions and recommendations as stated in the Safety Data Sheet (SDS) for this product have been fully understood by all persons who will work with the material.

STORAGE

Keep out of reach of children. Store in a sealed container in a cool, dry place (between 8°C - 27°C). Do not return any unused material to its original container.

Containers must be secured and stored upright during transit.

DISCLAIMER

Chemtools® has made every effort to ensure the information provided in this Technical Data Sheet is accurate at the time of publication. Chemtools® expressly recommends that the user make his/her own assessment to determine the suitability of the product for its intended purpose prior to application. Chemtools shall not be responsible for loss, damage, or injury, resulting from the reliance upon, or failure to adhere to, any recommendations or information contained herein; nor from abnormal use of the material; nor from any hazard inherent in the nature of the material.
